FILA FOR SKIING

 Fila for Skiing: continual research on fabrics and production techniques, creativity and the rigours of styling, are all subjected to the real test of the most prestigious champions who all agree once again that Fila have realized a skiing collection which has greatly changed. Revolutionary materials such as Gore-tex (waterproof and porous), garments cut and calibrated according to movement, co-ordinating totally with the skier, offer a new and free dimension to the clothes worn by those who love the snow and skiing.

Back in the 80's

Fila was the favorite brand for ski aficionados back in 80s – and so flash it would not look out of place today.
